ELSEVIER

Journal of Hydrology 225 (1999) 196

Journal of Hydrology

Contents of Volume 225

Vol. 225 Nos. 1–2 NOVEMBER 22 1999

Research papers

Transient well flow in vertically heterogeneous aquifers
C.J. Hemker 1
Transient well flow in layered aquifer systems: the uniform well-face drawdown solution
C.J. Hemker 19
Parameter estimation of Neyman–Scott processes for temporal point rainfall simulation
G. Calenda and F. Napolitano 45
A comparison of downscaled and raw GCM output: implications for climate change scenarios in the San Juan River basin, Colorado
R.L. Wilby, L.E. Hay and G.H. Leavesley 67
A comparative study of regression based methods in regional flood frequency analysis
G.R. Pandey and V.-T.-V. Nguyen 92

Vol. 225 Nos. 3–4 DECEMBER 6 1999

Research papers

Towards operational guidelines for over-threshold modeling
M. Lang, T.B.M.J. Ouarda and B. Bobée 103
Runoff and sediment transport in a torrential ephemeral stream of the Mediterranean coast
J. P. Martín-Vide, D. Niñerola, A. Bateman, A. Navarro and E. Velasco 118
Cl/Br ratios of Lake Kinneret, pore water and associated springs
G. Dror, D. Ronen, M. Stiller and A. Nishri 130
Water application frequency effects on steady-state solute transport parameters
M. Persson and R. Berndtsson 140
A tracer experiment to study flow paths of water in a forest soil
H. Feyen, H. Wunderli, H. Wydler and A. Papritz 155
Modelling rainfall interception by a lowland tropical rain forest in northeastern Puerto Rico
J. Schellekens, F.N. Scatena, L.A. Bruijnzeel and A.J. Wickel 168
Modelling of helium transport in groundwater along a section in the Pannonian basin
L. Cserepes and L. Lenkey 185
